WEATHER OBSERVATIONS. WAR DEP'T, SIGNAL SERVICE, U. S. ARMY, SATURDAY, August 16, 1879, 10:08 p.m. 

THE SITUATION.

The official reports from the books at the office of the board of health for the twentyours ending six o'clock last evening wenty-one new cases of the fever and late, five hundred and thirty-two, and of deaths, one hundred and fifty-three. Of the new cases seven are white and fourteen one colored. It will be seen that the colored Cant continues to predominate in the sick Est, while the whites lead the list in the death roll. To the unecasonably cool weather, which up to late yesterday afternoon was also raw and damp, is attributed a number of the deaths which occurred in the past twentyloars. The vicather conditions changed for the better somewhat last night, though temperature continues low, which be favorable for those fever. elsewhere show that for the week ending at six o'clock yesterday evening forty-six deaths have occurred, caused by yellow-fever; of these, ten were colored and thirty-six whites. During the same time one hundred and eighty-three cases of the plague were reported, of which sevenly-one were whites and one hundred and twelve colored. The localilies of the cases show that a third infected district, embraced in the fifth and sixth wards, has developed, while the third and ninth wards show not a single new case during the week, and the first and second wards send ro but five cases jointly.

And now comes the Washington correadent of the Cincinnati Enquirer, writing ler date of the thirteenth, charging that appointments made daily by Secretary tion that he is not using the patrontreasury department to further own restless ambition. Two recent anges make it as plain as the noon-day sun agent, Colonel John G. Brownlow, of Tensee, son of the famous Ex-Parson Brownsitizen of Knoxville. The only cause for which he is turned out is that he favors the er, of Florida, was its chairman. He will assigned to no specific duty, and his main employment will be to work up enthusiasu ong the Habraws for Sherman,

Norsemen-just from Iceland. They think weather is exceedingly bot. They have in their possession one hundred thousand oin, with which to purchase land, ements and live stock. All of the adults are highly educated, and speak Latin and Greek, as well as the modern languages. If they like the country, they will be followed by hundreds of other families.

WE have received a number of communi cations which go to the waste-basket on acmatter being written on both strictly adhered to now than ever on account of the small force employed on the paper.

THE small number of new cases reported Friday, and an increase in yesterday's showing indicates, as a facetious physician remarked, that the plague had let go in order

THE M'KENZIE CONFERENCE

The change it is self, in view of the dangers that invested them, it must not be forgotten it was a bould come away. Have not these refugees, in about come away. Have not these refugees, in the common disaster? The truth is, the appearance of this or of any optemic is a national misfortune, and it should be refleved from the common treasure, the common treasure of the refleves of the common treasure. The common treasure of the content of the experiment of the content of the experiment of the lives of our clites and States, is not a postioned or an about of the superior of the experiment of the superior of the experiment of the M'Kenzie, August 16 —At the conference held this day at M'Kenzie, Tennessee there were present: Dr. J. L. Billing, vice-president, and Dr. R. W. Mitchell, member of the National board of health; Dr. J. D. Pinnkett, president, and John Johnson, member of the tate board of health; D. T. Porter, president Taxing-District of Shelby county; Dr. G. B. Thornton, president board of health, and A. D. Lar gataff, president board of health, and A. D. Lar gataff, president board of health, and A. D. Lar gataff, president board of health, and Mr. Lan-staff was appointed secretary. Dr. Billings stated the object of the meeting to be confer with each other in regard to what Memphis required and the postacility of estaining assistance from the National board of health. He then read the law as passed by the last congress to govern the National board of health in their expenditures, which is as follows:

"That the National board of health shall co operate with and so far as it is lawful may ald State and municipal boards of health in the esceution and enforcement of the rules and regulations of such boards to prevent the introduction of contagious or infectious diseases into the United States from foreign countries and into one State from another,

"Dr. Billings state i that the intention of congress was undoubtedly only to provide for quarantine restrictions and not for local sanitation, furnishing food, etc. The National board have, however, taken the ground from the first outbreak of yellow-fever in Memphis, that its duty to prevent the spread of the disease to adjoining States could be best performed by limiting the disease to Memphis by all possible means. To this end, as soon as the speroul of the accounting officers of the National freasury was obtained, funds to the aggregate of eighteen thou and dollars was placed in the hands of the disbursing officer of the National board of Tennessee, for expense of such protective measures by local board of health of Memphis as had been adopted by said board of health of Memphis as

chair, and Mr. Lan-stad was appointed secretary.
Dr. Billings stated the object of the uncelling to be to confer with each other in regard to what stemphis room the National hearth of containing assistance room the National hearth of containing assistance room the National board of health in their expenditores, which is as follows:

"That the National board of health hall co-operation and of are as it is lawful may aid State and forcement of the rubes and regulations of such north countries and into one State from another,

"Dr. Billings attate that the intention of congress with and to far as it is lawful may aid State and forcement of the rubes and regulations of such posterious titleases into the United States from sonther,

"Dr. Billings attate it that the intention of congress to prevent the introduction of containing the state from sonther,

"Dr. Billings attate it that the intention of congress with and for the intention of congress the condition of the condition of containing the state from sonther,

"Dr. Billings attate it that the intention of congress and into one State from sonther,

"Dr. Billings attate it that the intention of congress and in reasonable danger from its vigits, almost state in the state from sonther,

"Dr. Billings attate it that the intention of congress the properties of the state from sonther, and the condition of the state in the state in the state intention of the state in the

of rennessee would at once issue regulations having the force of law with regard to securing isolation of the sick and of infected localities. the stek and of infected localities.

Dr. Poster stated that he would enforce those regulations strictly through the local board of health and through other means.

A number of other questions were discussed looking to the future harmoniotis working of the several boards represented. Among the matters discussed was the resignation of John Johnson, which was tendered several days ago to the State board of health, but which was not accepted by said State board of health, Mr. Johnson being assured that the public good demanded the witherswal of his resignation, and he withdrew it. His resignation was not caused by any questionable transaction, as has been stated by any questionable transaction, as has been stated by the press, but by personal influences was tendered the Louisville, Nashville and Great Southern railroad for special trains; to the Chicago, St. Louis and New Orleans railroad, and the Nashville, Chattanooga and St. Louis railroad for courtesles and free transportation furnished them.

A. D. LANGSTAFF, Secretary.

CAIRO, August 16.—The local board of health to-day adopted resolutions that boats which have not landed within sixty miles of an infected point be permitted to land; provided, no passengers or freight be discharged until a clear bill of health from inspection station at Island 1 is shown, also the usual certificate from passengers that they have not been in an infected district within filteen days. The Congressional Relief Appropria-tion Bendy for Memphis Drafts. ecial to the Appeal.]

WASHINGTON, August 16 .- Comptrolle WASHINGTON, August 16.—Comptroller Porter, of the treasury department, says that if the National board of health is of the opinion that a contribution for the support of the people of Memphis in camps is absolutely necessary to prevent the spread of the fever into other States, a regulstion upon the five hundred thousand dollars appropriated by congress will be honored.

BY MAIL.

YELLOW-FEVER AND THE COLORED PEOPLE

New York Herald: "Have the negroes of Tennessee lost this year that comparative immunity from yellow-fever which is one of the attributes of their race in our climate? or has the fever in Memphis undergone such a change in its character that it would be properly described by another name? On Sunday the new cases were divided between white and colored patients in the proportion of seventeen of the latter to only twelve of the first, and it has happened several times lately that more than half the patients in the new cases, were negroes. From a third to a half of those taken every day are, in fact, the men and women of a race which has hitterto been observed to be very much less subject to this malady than the whites. How is this change to be accounted for? We believe it is due to the fact that the fever is not purely yellow-fever, but is one in which the typhus poison is more responsible than the other for this year's operations. It was thought last year that the fever was more a typhus fever than a yellow-fever in its commencement; but as the summer went on its character became plain enough, and no doubt this year it started directly enough from yellow-fever fomites. But depression, demoralization, privation, neglect and filth have together at last brought upon the scene another minister of death, and one which has not that peculiar respect for the African race which is supposed to distinguish Yellow Jack. Here, for instance, is a history of a family of nine pers ms: Mrs. Forbes and six children, whose ages range between seven and sixteen years, are sick, all in one room. Charles S. Forbes and his son William died of the f.ver on the first instant, and the remaining seven members of his family were stricken yesterday. There is a small cellar, three feet deep, which had been used as a privy vauit by the family. From this cellar the stench was so great that the five nurses seat by the Howards coul not remain inside the dwelling until it had been deliged with powerful disinfect FELLOW-FEVER AND THE COLORED PEOPLE

inge rents and the lion's share of the taxes. If, as is contemplated, several of the learing business houses move to other cities, those fossilized property owners will find that their stores and warehouses will be tenanted by rats—they will discover, when too late, that they have killed the goose which laid the golden egg. These men know that property which would readily sell for four and five hundred dollars per front foot three years ago would not today bring one-third of that amount, ret they are so short sighted that they believe the merchants will still pay them the rents of those times. If a New York business man were to figure on a question of this kind he would soon reason some what in this manner, 'I own property which cost me fifty thousand dollars. There is a chance of its becoming valueless if certain improvements are not made. With these improvements the property would be worth what I paid for it. Now to make the necessary improvements I am willing to give a reasonable part of the property's value—ten, fifteen or twenty thousand dollars—for it is better to save a part than lose the whole.' Yes, that would be the conclusion of reasonable men everywhere, but it does not prevail with the property owner of Memphis. This bat-like individual is forever growling about laxes, when in truth the business men are the ones who carry the burden, and yet he is pursuing a course that will inevitably end in forcing the merchants with their capital to climes where man who own property are willing to make it babitable. The few leading merchants who still intend to give another opportunity to the men who own Memphis, will take their departure, if on the advent of the cold weather a proper spirit is not manifested to at once go to work and do that thing thoroughly which should have been done ten years ago. The med call men of Memphis are never united. Many of them insisted as late as July 21st, that there was no yellow fever there. To carry out their theory those on whom they walted received treatment according to th Distribution of Deaths by Wards .- First, 5; second, 0; third, 1; fourth, 1; fifth, sixth, 3; seventh, 13; eighth, 23; ninth, tenth, 10. A Discord in Black and White.

California, Mo.. August 10.—The colcred fraternity of this city and surrounding country had a picnic in a grove near town yesterday, which concluded with a ball at night at one of the shantles. After the ball had been under way sometime, it was interrupted by a number of young men and boys, some of whom made a practice of running with the negroes. A quarrel soon began, in which razors clubs and pistols were freely used, and in the melee which followed a joudg man named Sam Wyrick was shot through the body by a negro named Maupin, and died in fifteen minutes. Tom Wyrick was also shot in the hand. A negro named Wesley Pare was badly cut, and several others knocked down. The coronor's jury has been all day investigating the matter, and it will be continued by the grand jury, which meets to-morrow. The general opinion is that the boys had no business there, and must put up with the consequences.

Aspirants.

Scrofulous Ulcers and Sores, Abscesses, Milk Leg, Fever Sores, Erysipelas Sores, Old Sores and Discharging Wounds, Boils, Carbuncies and Blood Impurities, which manifest themselves by bursting through the skin and eating deep into the flesh, when treated internally by the Cuticura Resolvent and externally with the Cuticura and Cuticura Sorp, rapidly heal and disappear. Salt Rheum or Eczems, Tetter, Ringworm, P. orlasis, Leprosy, Barber's Itch and all Scaly and Itching Eruptions of the Skin; Beald Head, Dandruff, and all Irritating and Itching Humors of the Scaip, which cause the Hair to become dry, thin and lifeless, and result in Premature Baldness, are permanently cured by the Cuticura Remedies.

SKIN DISEASE.

A Remarkable Letter from J. A. Tacker, Esq., Manufacturer of the Bay State Superphosphate.

MESSES. WEEKS & POTTER—Gentlemen: I think I have paid for medicines and medical treatment during the last twenty years all of three thousand dollars, without receiving any permanent relief.

Last May while taking a rurkish bath at 17 Bea con street, a young man employed there by the name of William Corbett induced me to allow him to apply a preparation that he had upon me, assuring me that it was perfectly harmless, and for a certain consideration he would cure me within thirty days from the time he commenced. In case he falled to do so I was to pay him nothing. I consented and he applied it nearly every day for five weeks, when the disease entirely disappeared. I very cheerfully paid him the amount agreed upon, and then asked him what this remedy was, and he replied that it was no other than Cuticura.

Since that time I have had no trouble from this disease, and have not had such good bealth in twenty

Since that time I have had no trouble from this disease, and have not had such good health in twenty years as I have had during the last six months.

I have since my recovery bought Culicura and given it to friends suffering with skin diseases, and in every instance it has cured them. I believe it to be the greatest discovery of the present century.

A PROMINENT PHYSICIAN. ROCKDALE, TEXAS, Jan. 10th, 1879.

MR. J. C. RICHARDSON, St. Louis. My Dear Sir:—
I have sold Clifford's Febrifuge since its introduction in Central Texas, in fact I may say I introduced it in Milam County. It has given uniformly good satisfaction, and its merits are constantly recommending it from citizen to clitzen, in the speedy and effective cure of Intermittent Fever, (Fever and Ague.) and Fevers of Malarial Origin. I am always pleased to sell Clifford's Febrifuge on account of its efficiency, knowing it will not disappoint my customers, and being so palatable, makes it the most pleasant remedy for the cure of Chills and Fever.
